To Boost the Iron Deficiency, Immunity, Sperm Count and Sperm Motility

℞ GUANOLACT®

Lactoferrin 50 mg + Disodiumguanosine 5- Monophosphate 5 mg, Ferrous bisglycinate 60 mg (equalant to elemental iron 30 mg)

LACTOFERRIN

- Lactoferrin binds with the unused iron in the blood and convert in to Heamoglobin
- Facilitates absorption of iron and reduces maternal inflamation
- Prevents low birth weight preterm delivery and reduces neonatal deaths
- Increases the sperm count and sperm motility
- Acts as a strong modulatory effect on the adaptive immune system

FERROUS BISGLYCINATE

- Ferrous bisglycinate was an effective and safe source of iron that was particularly useful as an iron forti ficant in diets rich in phytate.01-Dec-2000
- Iron Deficiency Anemia (IDA) is a major public health problem worldwide. Iron Bisglycinate Chelate (FeBC) and polymaltose iron (FeP) are used for the treatment of IDA and exhibit good tolerability with a low incidence of adverse effects

DISODIUM GUANOSINE 5 MONOPHOSPHATE

- DISODIUM GUANOSINE 5 MONOPHOSPHATE
  Is used to treat iron disodium guanosine 5'-monophosphate Cytidine 5'-monophosphate is one of four nucleotides that are added to most standard infant formulas deficiency and iron deficiency anaemia in pregnant women.
- Disodium guanosine-5-monophosphate regulates ion channel conductance, glycogenolysis (the process of making glucose or sugar from its breakdown products or the breakdown products of lipids or proteins), and cellular apoptosis (the process of programmed cell death).

INDICATIONS

- **Prophylaxis and treatment of iron deficiency anaemia**
- **To increase the Sperm count and Sperm motility**
- **Adjuvant in infections (Bacterial, fungal, and parasitic infections)**
- **Maintaining Healthy bones and new bone formation**
- **Adjuant therapy in the treatment of cancer**

TELOMERES are the protective caps at the ends of the Chromosomes; they act like plastic tips of shoelaces, preventing DNA damage, maintain genome stability and ensure proper cell function.

Telomeres are very important for

- **CELL PROTECTION:**
  They prevent chromosomes from fraying and sticking together.
- **CELLULAR AGEING:**
  Each time a cell divides Telomeres shortens, when they become too short cells stop dividing that leads to cellular apoptosis and causes Ageing.
